Functionality Guide to Taskflow Web Application

This web application provides registered users with capabilities to manage their tasks efficiently. Key functionalities include:

1. User Authentication:

Users can log in to the task management system with their user name and password

New users can register for an account, providing their email address, username, and password.

2. Task Management:

Upon logging in, users are presented with a task management page displaying their existing tasks.

Users can add, edit, and delete tasks seamlessly from this interface.

3. Search and Filtering:

Users have the ability to search for specific tasks and filter tasks based on status, due date, and priority.

4. Logging out:

A logout button located at the top of the page allows users to securely log out of their accounts when they're ready to leave the site.

5. Responsive design

The application is responsively designed to ensure best user experience across different devices.
